Cannabis Science

Understand what CBD is and how it functions in the body before delving into the details of [Atena Labs organic CBD Gummies anxiety relief](#). Within the Cannabis sativa plant, CBD is one of more than 100 chemical substances referred to as cannabinoids. CBD is not psychoactive, unlike its more well-known relative THC (tetrahydrocannabinol), hence it does not provide the "high" linked to marijuana usage.

Researchers investigating THC discovered the intricate endocannabinoid system (ECS) in the early 1990s, with which CBD interacts. Sleep, mood, hunger, memory, and pain are just a few of the many functions and processes that the ECS controls so well.

Comprising endocannabinoids, receptors, and enzymes is the ECS. Bodies produce chemicals called endocannabinoids. Though created inside, they resemble cannabinoids.
