About Xanax (Alprazolam)

Xanax is a benzodiazepine medication commonly prescribed to treat anxiety, panic disorders, and stress-related sleep disturbances. It works by enhancing the calming neurotransmitter GABA in the brain, reducing excessive neuronal activity, and promoting mental calm.

Xanax is prescribed for:

- Generalized Anxiety Disorder (GAD)
- Panic Disorder
- Short-term management of stress-related insomnia
- Nervous tension or restlessness

MedsFedEx.com offers multiple strengths and formulations, allowing you to select the dosage recommended by your healthcare provider.
