It reduces DHT levels in the body, therefore concentrating on the primary cause of prostate enlargement. Every year, many men experience issues resulting from an

enlarged prostate, sometimes known as BPH. This supplement seeks to solve this problem from its source without running the danger of negative side effects. It promises to lessen symptoms associated with an enlarged prostate in ways not possible with standard drugs.

### How Does Vital Flow function?

Focusing on DHT, a hormone vital for men's sexual development but which can induce prostate enlargement if its levels are too high or too low, [Vital Flow Canada Optimal Performance](#) is a supplement helping with prostate health. Particularly in disorders like BPH (enlarged prostate), this hormone is a major contributing cause to prostate issues.

It operates in easy phases as follows:

- First, it addresses urgent concerns such renal difficulties resulting from prostate problems by quick action.
- Reducing DHT Levels: This phase removes associated pollutants and reduces DHT hormone in the body.
- Cleaning the blood helps to eliminate germs and dangerous elements.
- Fixing any obstructions will help to improve urine flow and ease urinating difficulties.
- Stopping DHT from Coming Back: The last stage eliminates DHT from the body to stop further prostate problems.

Furthermore included in it are chemicals that reduce edema, a condition aggravating prostate problems, hence relieving symptoms related to an enlarged prostate.

### Fundamental Components of VitalFlow

Medical evaluation of Graviola usage for cancer therapy by Family Practitioner Melinda Ratini, DO, revealed that Graviola fruit pulp extract can inhibit the spread of prostate cancer cells. An important ingredient in the [Vital Flow Prostate Support United Kingdom](#) product, graviola increases its potency.

It consists of these main active components:

- Packed with fatty acids, flavonoids, and plant sterols, Saw Palmetto lowers prostate inflammation by stopping the conversion of testosterone to dihydrotestosterone, therefore relieving strain on the urethra.
- Targeting cancer cells and viral infections, Cat's Claw comes from the bark and root of the cat's claw vine. It is full of molecules like phenolic acids, alkaloids, and flavonoids that target sterols and tannins so neutralizing viruses like herpes.
- Known sometimes as Brazilian Paw-Paw or soursop, graviola has anti-inflammatory and antioxidant properties. It aids in control of blood pressure, blood sugar, and more.
- An African evergreen tree, Pygeum Africanum is used to treat enlarged prostate. It relieves urinary issues brought on by a prostate enlargement.
- Tomato fruit is a naturally occurring cleanser and antioxidant that helps the blood to be purified, toxins to be eliminated, and inflammation connected to an enlarged prostate to be lowered.
- Rich in nutrients like lipids, amino acids, vitamins A, B, C, and K, pigments, polyphenols, and more, stinging nettle root has antioxidant qualities, relieves enlarged prostate symptoms, reduces blood pressure, and helps regulate blood sugar.
