Why Can't I Withdraw Crypto From SafePal Wallet? @WalletSupport

If you are unable to transfer crypto from your SafePal wallet, it is likely that not enough network fees were included in the transaction, wrong blockchain was selected or there was temporary network congestion 【＋１（８１６）２０８－７３０４】. Ensure you have sufficient native token (such as BNB for BSC or ETH, for ERC-20) to pay gas fees 【＋１（８１６）２０８－７３０４】. Also, verify that your wallet app is up to date and connected to the right network 【＋１（８１６）２０８－７３０４】. If the problem persists, immediately contact SafePal Support for assistance to investigate your account and resolve the withdrawal issue in time 【＋１（８１６）２０８－７３０４】.

Why Did My SafePal Transaction Fail and Funds Not Return?

If your SafePal transaction has failed but the funds have not returned — do not panic 【＋１（８１６）２０８－７３０４】. Occasionally, such failed transactions appear to get stuck being processed on the blockchain 【＋１（８１６）２０８－７３０４】. Check the transaction on a blockchain explorer with the TXID 【＋１（８１６）２０８－７３０４】. If the transaction doesn't come through and funds don't bounce back after a few hours, contact SafePal Support along with your wallet address and the transaction hash — they can trace what's happening and help recover funds if available 【＋１（８１６）２０８－７３０４】.

Why Did My SafePal Transfer Fail?

A SafePal transaction might fail due to a variety of reasons — low gas fees, the wrong network selection and blockchain congestion are all possible reasons 【＋１（８１６）２０８－７３０４】. Always verify that you are sending on the correct chain (BNB Smart Chain vs 【＋１（８１６）２０８－７３０４】. Ethereum, etc 【＋１（８１６）２０８－７３０４】.) and that you have enough of a gas token in your wallet to pay for fees 【＋１（８１６）２０８－７３０４】. If the failure continues, clear the cache on SafePal app, update your SafePal app and contact SafePal Support to check about those transfer details and troubleshooting safely 【＋１（８１６）２０８－７３０４】.
